

This pamphlet was prepared through the joint efforts and diligent work of many people in the aviation community of Southeast Alaska and the FAA. It is packed full of flight tips, safe operating practices, recommended procedures, and aerial tour information for pilots operating in the vicinity of Juneau, Sitka, Skagway and Gustavus, Alaska. Many aircraft fly tourists to points of interest. The most popular tours are mentioned in this pamphlet.

Included are recommended altitudes, direction of flight, reporting points, VHF frequencies and areas of increased air traffic used by commercial operators.

These are general procedures of which all pilots should be aware. If it is necessary to operate contrary to the recommended procedures, pilots should announce their intentions in advance on frequencies published in this pamphlet.

To enhance the safety of your flight, contact the nearest Flight Service Station for a complete pilot briefing. For more information, contact the Juneau FSDO at 800-478-2231, or 907-586-7532.

Terry L. Gordon, Manager  
Juneau Flight Standards District Office

Steve Turner, Manager  
Juneau Air Traffic Control Tower

Carol Veazie, Manager  
Juneau Automated Flight Service Station
