## COMMON TURBOJET ROUTES - GUSTAVUS

The following depiction of VFR routings are the preferred routes for turbojet aircraft. Normal VFR rules apply and aircraft are free to deviate from these routes to safely comply with FARs and good operating practices. The altitudes depicted are approximate altitudes for arriving aircraft. Except where VFR enroute altitudes are shown for short trips between two closely located airports, departing aircraft are climbing at high rates along depicted departure paths to high enroute altitudes.
