

SALMON FALLS AND POINT ALAVA ROUTE

Aircraft should monitor 122.70 between Salmon Falls and New Eddystone Rock.

Aircraft should monitor 122.75 while in the Rudyerd Bay tour area.

Pilots are cautioned to remain at least 500 feet away from any person, vessel, vehicle or structure.

Recommended altitudes are 1500 feet AGL and above outbound, 1000 feet AGL and below inbound.

Reporting points are as follows:

- Moser Bay
- Rudyerd Bay
- Mirror Lake
- Point Alava
- New Eddystone Rock
- Smeaton Island
- Heckman Lake
- Bold Island
- Please be aware of blasting in Carroll Inlet due to road building for logging operations. Also be aware of power lines from Swan Lake to Ketchikan.

See Example of this route on the opposite Page.
